

Explore the Advantages of Test Chamber Rental

Could renting a test chamber be one of the smartest business decisions you make this year?

The benefits of rental are well documented: Covering short-term or urgent requirements, levelling peak demands, providing additional test capacity for one-off projects or gaining additional capability beyond the usual requirements.

Renting a test chamber can also provide an opportunity to 'try before you buy'. You may have identified a need but have yet to determine the long-term requirements. A hire chamber will let you keep a test programme running while you evaluate performance and results before making a commitment to buy. It offers flexibility and the chance to upgrade or completely change the equipment specifications.

You will avoid capital outlay and the costs of ownership and as you only hire a chamber for the time you need it, you will find it easier to control budgets and allocate finance to specific projects or tasks. Maintenance will not be a worry as this is fully covered and you will not need the resources to store redundant equipment.

Explore the Advantages of Test Chamber Rental

CVMS Climatic has several test chambers available for short or long-term hire. There is no minimum or maximum hire period and discounted rates are offered for long-term commitments. We can offer test chambers and ovens with the following capabilities:

- **High Temperature:** Ambient to +300°C for conditioning, ageing, curing.
- **Temperature Cycling:** -70°C to +180°C.
- **Climatic Testing:** 20%RH to 98%RH.
- **Air Treatment Units (ATU):** -70°C to +150°C in remote insulated enclosure.
- **Corrosion Testing:** Salt Spray and Ozone ageing tests.

As we rotate our demonstration stock, more equipment will become available with additional features, so it is worth checking with us if you have a specific requirement.

Benefits of Renting:

Tailored Flexibility: Rent short or long-term with no minimum period. Adjust the specifications as your project evolves.

Cost-Effective: Save on capital outlay and ownership costs. Budget easily with our flexible rental plans, and only pay for what you use.

Try Before You Buy: Unsure of your long-term needs? Use our chambers to keep your programs running while evaluating their performance.

Zero Maintenance Hassle: We cover all maintenance, so you can focus on your critical work without additional overhead.

Discover how our rental solutions can elevate your testing processes. Contact us to learn more about our constantly updating stock and secure your test chamber today!
